Status of Application

1. Acknowledgment is made of the amendments filed 05/17/2010. Upon entering the amendments, the claims 7-8 are cancelled, claims 13-14 are added, and claims 2-3, 9, and 12 are amended. Claims 2-3, 9, and 12-14 are pending and presented for examination.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bernadette McGann on 07/20/2010.

The application has been amended as follows:

Claim 2, line 1, before "according to" delete "The coloration agent" and insert - -
The color developing clay - - .

Claim 9, line 1, before "of claim 3" delete "The coloration agent" and insert - - The
color developing clay - - .

Claim 13, line 1, before "according to" delete "The coloration agent" and insert - -
The color developing clay - - .

Claim 14, line 1, before "of claim 12" delete "The coloration agent" and insert - -
The color developing clay - - .

Objections Withdrawn

3. Claim 9 has been amended to overcome the objection previously issued. The objection is therefore withdrawn.

Response to Arguments

4. Applicant's arguments are persuasive at showing the distinctness of the amended claims over the prior art applied in the previous office action. The amendments change the claims to fully reflect applicant's inventive color developing clay composition, and applicant's arguments correctly point out that the amended claims all incorporate the subject matter deemed allowable in the previous office action. Therefore, the previously issued grounds of prior art rejection are withdrawn.

Allowable Subject Matter

5. Claims 2-3, 9, and 12-14 are allowed.

Reasons for Allowance

6. The following is an examiner's statement of reasons for allowance: The prior art of record, either alone or in combination, fails to anticipate or render obvious the instantly claimed color developing clay. Specifically, the prior art fails to teach a color developing clay comprising a clay raw material mixed with 1-5 wt% of a coloration agent comprising a metal powder separated from shot waste wherein said metal powder contains metal oxide powder and the said metal powder also is comprised of 70-80 wt% of total iron or 60-65 wt% of ferric oxide powder. Newly added claims 13-14 are allowed as dependent from previously pending allowed claims.

The most relevant prior art reference found is Berry (US 4273807). The difference from instant claims is that while Berry teaches a metal powder mixture that could be used as a coloration agent, said powder comprising at least 25 wt% and specifically 77.39 wt% iron metal, the patent does not teach a color developing clay comprising 1-5 wt% of this powder mixed with a clay. For the above, reasons, the subject matter of the amended instant claims is neither taught nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
